

USA - UPDATED VERSION

Day 0 — Cold Outreach

Send Version 1, 2, or 3 (pick one per prospect, or split-test across your list — don't send more than one version to the same prospect).

If they reply → send 2.1 Follow up for Email-Reply Prospects same day or next business day.

Once they send SKUs → send 2.2 Delivery of SKUs with Enriched AI Readiness Report within 1 business day of receiving the SKU list (matches the report's own stated turnaround).

If no reply, wait until Day 4–5.

Day 9–10 — Follow-up for No-Reply Prospects (2.3)

The "following up in case this got buried" email.

If still no reply, wait until Day 12–14.

Day 12–14 — Delivery of AI Report for No-Reply Prospects (2.4)

Self-selected 5 SKUs, sent as proof rather than another conversation.

Day 16–18 — Expo Invite, Prospect Never Responded (3)

If they reply interested but can't attend → send 3.1 same day or next business day (this is a reply-triggered email, not tied to a fixed day).

Day 18–20 — Break-up Email (4)

Final touch. Stop after this regardless of outcome — a further touch past this point costs more in domain reputation than it can recover in replies.

1. Content

Version 1

Subject: Who AI recommends instead of [Company] for [Product]?

[Name],

Manoj here, from AltiusNxt.

I ran a few buyer-style queries for [Product] through ChatGPT, Claude, Perplexity and Gemini this week — the kind a buyer types when shortlisting suppliers. [Company] wasn't the one recommended. Two other suppliers were.

Usually this is not a product issue — it is a data issue. AI engines only recommend listings they can parse with confidence, and most distributor product data isn't structured for that yet.

We have spent 20+ years fixing exactly this for distributors like Vallen, Travers Tool Co Inc, Industrial Sales & Engineering Co, Coastal Farm, SRS Distribution Inc, etc.

If you send over 5 SKUs, I will run the same test on them and send back a before/after, which takes about a day.

Manoj

.....

Version 2

Subject: Ran a test on [Product] across the AI LLMs — thought you did want to see it

[Name],

Manoj here, from AltiusNxt.

Before reaching out, I wanted to check something rather than just claim it: how does [Product] show up when someone asks ChatGPT, Claude, Perplexity or Gemini for a recommendation? I ran it myself — [Company] didn't come up as the pick in any of the four.

That's usually not a quality problem. It's a data problem; these engines only surface listings they can parse with confidence, and most distributor catalogs are not structured for that yet.

We have spent 20+ years fixing this for distributors, including Vallen, Travers Tool Co Inc, Industrial Sales & Engineering Co, Coastal Farm, SRS Distribution Inc, etc.

Send me 5 SKUs, and I will run the same test and send back a side-by-side comparison; I should have it back to you within a day.

Manoj

.....

Version 3

Subject: [Company] vs. the AI LLMs — a quick comparison

[Name],

Manoj, from AltiusNxt.

A growing share of B2B buyers now ask ChatGPT, Claude, Perplexity or Gemini directly instead of searching for the best [Product] supplier who carries [Product] near me. I tried a few of those searches for [Company] this week.

[Company / Product] was not the one recommended. Two other suppliers were.

AI engines recommend what they can confidently parse, and a lot of distributor product data is too sparse or inconsistent for that. Every query where you are not the pick is a buyer looking at someone else's page instead.

We have spent 20+ years solving exactly this for distributors - Vallen, Travers Tool Co Inc, Industrial Sales & Engineering Co, Coastal Farm, SRS Distribution Inc, etc.

Send over 5 SKUs, and I will run the comparison and get you a before/after within a business day.

Manoj

.....

2. Follow Up for Replied / No Reply Prospects

2.1 Follow up for Email -Reply Prospects

[Name],

Thanks for the quick reply, and for sending over the 5 SKUs.

I will run each one through ChatGPT, Claude, Perplexity and Gemini using the kind of buyer query someone would actually type while shortlisting a [product category] - then send you a before/after AI Discoverability report showing exactly what these engines see today versus what's possible once the data's enriched.

Turnaround is about 1 business day (8–12 hrs).

One more thing, in case timing works better in person:

We will be at B2B eCommerce World 2026 (Nov 2–3, JW Marriott, Indianapolis).

Happy to set up a booth demo if you are attending — no pressure either way, the reports coming regardless.

Talk soon.

Manoj

2.2 Delivery of SKUs with Enriched AI Readiness Report

[Name],

Here is the enriched AI Discoverability Report for the 5 SKUs you sent over: [1st SKU name], [2nd SKU name], [3rd SKU name], [4th SKU name], [5th SKU name].

It shows exactly what ChatGPT, Claude, Perplexity and Gemini return for each product today, and what changes once the data's enriched and structured for these engines to read.

Quick headline: [X of 5 went from not recommended to appearing in the AI answer] - attached is the full before/after for each.

These five span different categories, so it's a fair test of how the same approach would hold up across your wider catalogue.

Want to walk through it together? 20 minutes is enough to cover all 5 examples and how this scales. What is a convenient time for you this week?

Manoj

2.3 Follow up email for No Reply Prospects

[Name],

Following up in case this got buried; happy to keep it short.

The AI Discoverability test I mentioned still stands:

[Product] was not the one recommended by ChatGPT, Claude, Perplexity or Gemini, while [Client Company Name] showed up as a generic buying-group mention. That gap tends to widen the longer the underlying data stays unstructured.

If it's useful, send over 5 SKUs (or tell me to pick a representative mix) and I will get you a before/after AI Discoverability Report within a business day — just need the SKU list to get started.

If now is genuinely not the right time, just let me know, and I will check back later.

Manoj

2.4 Delivery of AI Report for No Reply Prospects

[Name],

Haven't heard back, so rather than follow up again with just words, I picked 5 representative SKUs from [Company]'s catalogue and ran the same test I mentioned — the kind of buyer query someone would type into ChatGPT, Claude, Perplexity or Gemini while shortlisting a [product category].

Attached is the full AI Discoverability Report, with before/after for each:

- [1st SKU name]
- [2nd SKU name]
- [3rd SKU name]
- [4th SKU name]
- [5th SKU name]

Headline: [X of 5 were not recommended by any of the four engines] — the report shows exactly what changes once the data's structured for them to read.

These five span different categories, so it is a reasonable proxy for how this would play out across the wider catalogue.

Happy to walk through it — what's the convenient time this week for a 20-minute call?

Manoj

.....

3. Expo Invite - Prospect never responded

[Name],

We will be at B2B eCommerce World 2026 (Nov 2–3, JW Marriott, Indianapolis) — this year's theme is manufacturers and distributors leading in B2B digital commerce.

Happy to walk you through real before/after product enrichment examples at our booth, including a live AI Discoverability Report demo — no preparation needed on your end.

Booth slots are limited, so if you are planning to attend, let me know and I will hold a time for you.

Manoj

3.1 Prospect replies as interested, but cant attend the expo

[Name],

No problem, glad to hear there is still interest, even if the expo timing does not line up.

Easiest next step:

We run the free 5-SKU enrichment demo remotely and send you the before/after AI Discoverability Report, same as we would have shown at the booth. Just need 5 SKUs from you, or I can pick a representative mix.

If you would like to go deeper afterwards, our CEO would be glad to visit your office and walk through the findings in person. But let's start with the report, so you have something concrete to review first.

What would you prefer: I select the 5 SKUs, or you send over the ones you would like us to focus on?

Manoj

.....

4. Break up email

[Name],

Haven't heard back, so I will take that as timing not being right for [Company] — completely understand.

Before I close this out:

The AI Discoverability gap I flagged earlier does not stay static — the engines re-index every few weeks, so distributors who fix their product data now are the ones that get recommended by default going forward. Worth knowing even if it's not a priority today.

If there is someone else at [Company] who owns product data or digital, or any team, I am happy to loop them in instead. Otherwise, no worries at all the offer stands whenever it's useful.
