

Product Data Page (PDP) Enrichment Report

Before & After Comparison — Personal Protective Equipment & Laboratory Consumables

This report presents an objective Before & After audit and comparative evaluation of a single Product Detail Page (PDP), demonstrating how a laboratory disposable glove listing from Arete Ltd — characterized by sparse specifications, missing manufacturer part numbers, unindexed mechanical and chemical barrier parameters (such as EN ISO 374 permeation types, AQL quality standards, tensile strength, and food contact compliance), and absent technical documentation — is transformed into an attribute-rich, taxonomy-compliant, and faceted-search-ready product master record on the modern AltiusNxt B2B commerce platform. The audit evaluates data completeness, classification rigor, PPE engineering compliance, and commercial procurement readiness.

Product Category	Safety > Gloves and Hand Protection > Disposable Gloves > Chemical-Resistant Nitrile Gloves
Source (Before)	Arete Ltd — Nitrile Disposable Gloves Size: Extra Large (Pack of 100) (SKU: AA1999905275-XL)
Enriched (After)	AltiusNxt — Ansell TouchNTuff® 92-600 Disposable Nitrile Gloves, Green, Latex-Free, XL (Mfr Part Number: ANSE92-600-XL UNSPSC: 46181504)
Prepared For	Francis, Arete Ltd
Prepared By	Manoj S, Digital Commerce Lead, AltiusNxt Technologies Pvt Ltd
Audit Date	8 September 2026

Strategic Executive Summary:

Laboratory procurement teams, pharmaceutical cleanroom technicians, industrial hygienists, and chemical safety officers require rigorous parametric specifications before purchasing hand protection and personal protective equipment. Critical barrier attributes — such as base polymer composition (100% nitrile), chemical splash resistance (EN ISO 374-1 Type B), biohazard viral penetration resistance (EN ISO 374-5), pinhole defect limits (AQL 1.5), tensile strength (≥ 10 N), elongation break points ($\geq 500\%$), powder and silicone-free purity, and international food contact compliance (FDA 21 CFR 177.2600, EU 10/2011) — are critical for laboratory compliance and chemical safety. Converting basic retail catalog pages into standardized technical matrices eliminates chemical exposure hazards, reduces pre-sales technical inquiries, and accelerates B2B procurement velocity.

CASE STUDY 01

Ansell TouchNTuff® 92-600 Disposable Nitrile Gloves

SAFETY > GLOVES AND HAND PROTECTION > DISPOSABLE GLOVES > CHEMICAL RESISTANT

ORIGINAL PRODUCT LISTING (BEFORE – ARETE LTD)	ENRICHED PRODUCT RECORD (AFTER – ALTIUSNXT)
The original Arete Ltd listing features sparse details for generic Nitrile Disposable Gloves (SKU: AA1999905275-XL), providing only basic size (Extra Large) and pack quantity (100 pack) at €7.70. Crucial protective and dimensional attributes — such as Glove Thickness (0.125 mm palm, 0.14 mm finger), Length (240 mm), Material Formulation (100% Nitrile, Latex-Free, Silicone-Free), Tensile Strength (≥10 N), Elongation (≥600%), AQL pinhole rating (1.5), Cuff Style (Beaded), Grip Texture (Smooth), and Safety Certifications (EN 388, EN ISO 374-1 Type B, EN ISO 374-5, FDA 21 CFR 177.2600) — are completely absent. Dimensions are listed simply as "N/A" with zero downloadable technical data sheets (TDS), chemical resistance charts, or CE declarations of conformity.	The enriched AltiusNxt record surfaces over 35 structured mechanical, barrier, ergonomic, and regulatory attributes directly in an interactive Technical Specification matrix, paired with dedicated tabs for Product Description/Features, Technical Data Sheets, Certifications, Installation/Usage Videos, and Customer Reviews. Every single parameter — from Brand (Ansell), Series (TouchNTuff®), Product Type (Disposable Nitrile Glove), Disposable Glove Type (Chemical-Resistant), Material (Nitrile), Color (Green), Cuff Style (Beaded), Glove Length (240 mm), Thickness, AQL (1.5), PPE Category (Category III), Chemical Splash Resistance (Type B JKPT), to Food Contact Compliance — is mapped into multi-attribute search facets. The enriched PDP features instant live stock availability ("In Stock"), transparent enterprise pricing, downloadable Technical Data Sheet PDFs, ANSE92 600 XL Certification PDFs, and comprehensive safety guarantees.

KEY TRANSFORMATION: The product data evolves from a basic commodity disposable listing into an enterprise-grade, certified chemical-resistant PPE master record. Laboratory managers, pharmaceutical researchers, and safety compliance officers can instantly filter gloves by chemical permeation resistance, palm thickness, cleanroom purity, and regulatory approvals, ensuring complete laboratory safety.

KEY ENRICHED HAND PROTECTION ATTRIBUTES CAPTURED

- Chemical & Mechanical Barrier:** TNT™ Chemical Splash Resistance Technology; certified under EN ISO 374-1:2016 Type B against n-Heptane, Sodium Hydroxide 40%, Hydrogen Peroxide 30%, and Formaldehyde 37%; EN 388 Level 1 Abrasion resistance.
- Biological & Contamination Safety:** EN ISO 374-5 certified virus protection; Acceptable Quality Level (AQL) 1.5 pinhole rating; 100% natural rubber latex-free and powder-free to eliminate Type I allergic reactions.
- Surface Defect Prevention:** Silicone-free formulation preventing contaminant transfer to sensitive laboratory assays, paints, optics, and precision electronic components.
- Ergonomics & Dimensions:** 240 mm (9.5 in) standard glove length, beaded cuff construction preventing cuff roll-down, 0.125 mm palm thickness, 0.14 mm finger thickness, smooth grip finish for tactile sensitivity.
- Tensile Performance:** Exceptional elasticity with ≥600% elongation at break before aging (≥525% after) and robust ≥10 N force at break, outperforming standard disposable latex and vinyl alternatives.
- Health & Food Compliance:** Dermatest® Certified supporting reduced risk of skin irritation; certified compliant with FDA 21 CFR 177-2600 and European food contact directives for food handling and processing.
- Taxonomy & Provenance:** Manufacturer Part Number (ANSE92-600-XL), UNSPSC Classification Code (46181504), Category III Complex Design PPE classification.

Ansell TouchNTuff® Disposable Nitrile Gloves, Green, Latex-Free, XL — Fully Normalized B2B PPE Master

Full Technical Specification Matrix

Complete normalized attribute schema extracted, validated, and mapped into the AltiusNxt Product Information Management (PIM) taxonomy:

Brand	Ansell	Series	TouchNTuff®
Product Type	Disposable Nitrile Glove	Disposable Glove Type	Chemical-Resistant
Material	Nitrile	Colour	Green
Latex-Free (Yes/No)	Yes	Powder-Free (Yes/No)	Yes
Silicone-Free (Yes/No)	Yes	Anti-Static (Yes/No)	Yes
Cuff Style	Beaded	Cuff Length	Standard
Texture	Smooth	Size - Alpha	XL
Size - Numeric	9.5 to 10	Glove Length	240 mm
Finger Thickness	0.14 mm	Palm Thickness	0.125 mm
Elongation at Break	≥600% (Before); ≥525% (After)	Force at Break	≥10 N (Before); ≥10 N (After)
Chemical Splash Protection	Yes	Abrasion Resistance	Level 1
EN 388 Rating	1XXXX	EN 388 Impact Rated	No
EN ISO 374 Type	Type B	EN ISO 374-5 Biohazard	Virus Protection
Acceptable Quality Level	AQL 1.5	PPE Category	Category III
Sterility Status	Non-Sterile	Double Gloving Method	Outer
Product Segmentation	Robust	Manufacturer Part #	ANSE92-600-XL
Package Type / Qty	Dispenser Box / 100 Gloves	UNSPSC Code	46181504
Country of Origin	Thailand; Sri Lanka	Dermatological Cert.	Dermatest® Certified
EN ISO 374 Chemicals	J - n-Heptane; K - Sodium Hydroxide 40%; P - Hydrogen Peroxide 30%; T - Formaldehyde 37%		
Standards Met	EN 388:2016; EN ISO 21420:2020; EN ISO 374-1:2016; EN ISO 374-5:2016; FDA 21 CFR 177-2600; ISO 18889:2019; ISO 9001; UKCA		
Special Features	Chemical Splash Protection; TNT™ Chemical Splash Resistance Technology; EN 388 Certified; Silicone-Free; Dermatest® Certified		

STANDARDIZATION & NORMALIZATION NOTES

- **PPE Parameter Disaggregation:** Generic glove descriptions are systematically parsed into discrete, filterable technical properties (thickness in mm, tensile strength in N, elongation %, and AQL level).
- **Chemical Resistance Schema:** Explicit indexing of EN ISO 374-1 Type B testing codes (JKPT) and biohazard virus permeation protection ensuring regulatory compliance for lab audits.
- **Cleanroom & Industrial Alignment:** Rigorous tracking of silicone-free, powder-free, and latex-free attributes to prevent surface defects and hypoallergenic reactions.
- **Digital Asset Association:** The enriched PDP provides direct one-click downloads for Technical Data Sheets (TDS) and EU/UKCA Type Examination Certificates.

SUMMARY & NEXT STEPS

Catalog Enrichment Audit Summary

This single-product PDP comparison illustrates how a laboratory consumable listing from Arete Ltd — previously limited by sparse specifications, missing manufacturer identifiers, unindexed barrier parameters, and absence of technical documentation — can be systematically converted into an enterprise-grade Technical Specification master record. The enriched page dramatically improves organic search visibility, faceted category navigation, side-by-side product comparison, and commercial procurement velocity while establishing essential laboratory trust signals.

Key Improvements Demonstrated

- **Structured, Tabbed Technical Specification Data:** Over 35 mechanical, barrier, ergonomic, and regulatory attributes exposed by default, eliminating ambiguity for laboratory technicians and chemical handlers.
- **Standardised Naming & Series Architecture:** Comprehensive product naming conventions incorporating manufacturer brand, series designation, polymer formulation, color, barrier technology, and glove size.
- **Faceted-Filtering Readiness:** Granular indexing by Polymer Material, Palm Thickness, AQL Level, Cuff Style, Chemical Resistance Type, Latex-Free, and Silicone-Free status.
- **Integrated Digital Documentation:** One-click direct access to downloadable Technical Data Sheets (TDS) and manufacturer Conformity Certificates.
- **Buyer Decision Tools:** Interactive SKU-level Compare, Wishlist bookmarking, Direct Inquiries, and frequently viewed complementary laboratory disposables (Hytec nitrile gloves, syringes, pipettes).
- **Real-Time Commercial Transparency:** Prominently displayed enterprise unit pricing, live warehouse inventory status ("In Stock"), multiple payment options, and verifiable manufacturer part numbers (#ANSE92-600-XL).

Recommended Next Steps for Arete Ltd

To scale this transformation across Arete Ltd's complete catalog of laboratory consumables, medical disposables, diagnostic glassware, hand protection, and cleanroom supplies, AltiusNxt recommends an end-to-end automated and expert-assisted catalog enrichment program:

1. **Full Catalog Data Health Audit:** Ingest existing SKUs across all lab disposables and PPE categories to benchmark attribute completeness and identify missing critical safety fields.
2. **Taxonomy Mapping & Schema Alignment:** Map legacy categories to global laboratory and healthcare hierarchies (UNSPSC / eCI@ss / custom B2B schemas).
3. **Automated Extraction & Parametric Normalization:** Enrich product titles, physical specifications, barrier ratings, EN/ISO certifications, and digital manuals directly from manufacturer technical cut-sheets.
4. **Pilot Batch Delivery:** Deploy a 250–500 SKU proof of concept to validate search filtration improvement, pre-sales inquiry reduction, and customer conversion lift across Malta and the European market.
